Personal Info

Apprentice:
Danilo Rodriguez Zapata

Institution:
SENA - Colombia

Program:
SENA - Colombia

THIS BROCHURE PRESENTS MY TRAINING PROGRAM, MY INTERESTS, AND MY PROFESSIONAL EXPECTATIONS AS A SENA APPRENTICE.

This brochure shows my learning path as an apprentice in the technology field. Through this program, I am building knowledge, discipline, and practical skills to understand real problems and propose digital solutions. It also reflects my motivation to learn, create, and contribute to the software development sector.

BASIC INFORMATION

The Software Analysis and Development program is a technologist training program offered by SENA. It has a duration of 3,984 hours and focuses on software requirements, design, development, implementation, and quality.

WHAT I HAVE LEARNED

I have studied mathematics, geometry, systems, software requirements, data collection instruments, prototypes, navigation maps, database models, entity-relationship diagrams, algorithms, object-oriented programming, and basic science topics.

My Expectations and Interests

I want to improve my programming, problem-solving, communication, and analytical skills. My goal is to design useful software solutions and grow as a competent software developer.
